ELLEGAARD Consult

AI in operations – for technical and project-driven companies

Most companies have given their employees access to ChatGPT or Copilot. Few have decided what AI should be used for, which data may be shared and who is responsible. ELLEGAARD Consult helps management and boards move from chat to operations: an AI strategy that fits the business, and solutions built into the processes. AI is a leadership task. The technology is the easy part.

THREE STEPS – START SMALL

1. AI in the boardroom

- 2-hour session for the board and executive team
- Opportunities, risks and the EU AI Act
- Draft AI policy
- Five questions for the executive team

2. AI check

- Pre-assessment form for management and board
- Maturity and risk across seven areas
- Mapping of core processes (Lean)
- 3–5 use cases with a business case

3. AI in operations

- Pilot on one process, measured before and after
- Set-up of AI assistants and agents
- Supplier selection together with you
- Training of key people

WHY ELLEGAARD CONSULT

Been in operations	30 years leading engineering, projects and companies in energy and industry. AI is applied to processes I know from the inside: bids, NCRs, change orders, QHSE and project follow-up.
Lean before AI	Remove the waste before automating anything. Otherwise you just automate the waste.
I build it myself	Co-founder and CEO of Suverita ApS, which develops EU-hosted AI solutions. I know what works in practice, and what it costs.
Board level	Board experience and CBS Board Education. AI is treated as a leadership responsibility, not an IT project: it is about business development, governance, data, risk and regulation.
Independent	The advice is not tied to any product. You choose the supplier – also if Suverita is an option.

TYPICAL USE CASES

Tenders and bids • Bid costing • NCRs and root causes • Change orders • Searching drawings and procedures • QHSE documentation • Project reporting • Contract review

BACKGROUND

Head of Engineering, Ørsted (500+ employees) • CEO and COO roles in energy and industry • Board member, Hydraulico A/S • CEO, Suverita ApS • B.Sc. EE, HD(O), CBS Board Education, IMD

Start with a fixed-price AI check – or a no-obligation conversation about where AI can make a difference for you.
